Many Champion Rosettes Won At Junior Dairy Show

Junior show activities occupied opening day at the Sixth Pennsylvania All-American Dairy Show in Harrisburg, Monday, with 555 entries including 4-H and FFA animals

Peter C Witmer, 16, of Willow Street R1, went the highest of any local entry showing "Penn Del Brilliant Connie" a 3-year-old, to win grand and senior championship honors in the 4-H Guernsey division of the 14th Pennsylvania Junior Dairy Show The animal's sire is "Melfield Brilliant" Peter, a 4-H member six years, is the son of Mr and Mrs Raymond F Witmer He also won master fitter and master showman awards

Henry Smeltz, 13, of Masonic Homes, Elizabethtown, won junior champion 4-H Ayrshire laurels with "Masonic Homes Flashy Bliss," an intermediate calf The junior champion was sired by "Oak Ridge Flashy Klondike." Henry, a 4-H member two years, is the son of Mr. and Mrs Robert Smeltz

(See Photos Page 17, 18 & 27)

In the 4-H Jersey Show Barbara Jeanne Aaron, 13, of Quarryville, R1, captured junior championship honors with her intermediate calf, "Blossoms Valor Emerald" Barbara, a 4-H member three years, is the daughter of Mr and Mrs William Aaron She also won master fitter and master showman awards. The animal's sire is "Ansom Valor"

Jesse L Balmer, Lititz R4, won both the reserve grand champion and reserve senior champion FFA Guernsey awards with his animal "Gordlines S H Holly" Jesse is the son of Mr and Mrs Jesse Balmer who live on a 150-acre farm

(Continued on Page 5)

Gehman Wins Ephrata Fair Steer Show

A Hereford was named grand champion and an Angus was named reserve champion at the Ephrata Fair Steer Show Thursday night and that made the third time since the local fair season opened last week that judges went to the combination Both Solanco and Lampeter Fairs had Herefords for champions and at Ephrata Fair it was Steven Gehman's champion Hereford that went on to grand

Eastern Pennsylvania And New Jersey

Prices of light type hens continued to advance 1½-1½c Demand continues good with bidding very competitive in the Pennsylvania area Supplies barely adequate for full needs in Pennsylvania, adequate from other sections as processors fill operating time with some heavier colored hens and in instances with some heavy whites. Offerings of heavy whites short to barely adequate of a good demand for ready-to-cook needs. Prices paid at farm: Light Type Hens 9-11½c mostly 11-11½c in Pa., mostly 9½-10c in N J Heavy Type Hens: Tfewr.

The outlook for Pennsylvania's apple crop, previously predicted to be the largest since 1964, is unchanged according to a September 1 survey of conditions by the State Crop Reporting Service The forecast of 510 million pounds, if realized, will be one-third greater than last year and one-fifth more than the 1963-67 average

Peach growers also are looking forward to a good crop year, the best since 1960, with a 120 million pound production

Pear production will dip 2 percent below last year, but the 3,200-ton prospective crop will be 8 percent greater than the five-year average

Grape prospects were revised downward The September 1 survey indicated a 32,000-ton crop, 3,000 tons beyow the previous month's estimate.

The State's vegetable crops generally fared well from August weather As a result, a September 1 survey of conditions by the Pennsylvania Crop Reporting Service indicated little changes in production estimates from the previous month

Snap beans for fresh market, unchanged from a month earlier, were forcast at 40,000 hundredweight, while the estimated yield of the processing crop rose to 14,400 tons.

Both late summer and early fall cabbage crops remained steady with production set at 369,000 cwt and 242,000 wt, respectively

Sweet corn for fresh markets was again estimated at 693,000 cwt, and the processing crop remained at 24,800 tons

From Where We Stand...

Tax Reform, Not Tax Shifting

Never in history has any government attempted to assume the burdens of life for so many people on a scale comparable to that now being undertaken in the United States Over the years, a multitude of social welfare programs have expanded with meteoric rapidity, and the end is nowhere in sight. Accompanying this vast expansion of welfarism has been a rising tax, public debt and government spending problem of such magnitude as to be insoluble in the view of some observers. Soaring taxes and inflation have reached such proportions that they have become subjects of dramatic headlines and feature stories that are avidly read by people who, a few years ago, gave no thought to such matters.

Life magazine lays the cards of inflation and taxes on the table for all to see in an article "The New Math of Inflation. . ." The article explains why there is a deep, bitter national resentment over taxes and government spending The inescapable fact is that after a decade of "the affluent society" people are finding that they have either stood still or have lost ground as incomes have failed to do more than barely keep pace with the eroding dollar Of late, with inflation running at an annual rate of 7 2 per cent the elaborate social welfare structure may be left far behind in a race with catastrophe And the great "middle class" presents "a portrait of a silent unblack, unurban, unaffluent America in seething revolt"

This so-called middle class promises to become an area of impoverishment which no welfare scheme can reach Life gives the stark figures — based on a family unit of four. Such a family, for example, that had a $10,000 annual income in 1959, paid $1,220 in federal taxes and $575 in local taxes, leaving a net income of $8,205. In 1969, the same family, assuming it had increased its income by 50 per cent to $15,000, is subject to a federal tax of $2,050, a local tax of $1,085 and an inflation tax of $3,085, leaving a net income of $8,780 In other words, in ten years this family has stood still and today is no doubt rapidly losing ground in the battle against inflation As Life points out, for those families on fixed incomes, the result has been disastrous: ". . . a 'middle-class' family with an income of $6,000 in 1959 had $5,215 left after taxes. With the same income today, its real (1959 dollar) disposable income is $3,890 — only $555 above the government's definition of poverty"

Facts such as these explain why we have heard so much about a taxpayer's revolt — something that governmental leaders genuinely seem to fear and apparently with good reason Thirty-seven cents of every dollar of income now goes to tax collectors. The question is, will taxpayers resentment bring an easing of the burden? Judging by current indications, there is little chance of this. Experts now estimate that a fully developed system of minimum income for all, of the nature proposed by the Administration, would cost $30 to $40 billion a year. This means that over the long run taxes will stay high. An end to the war in Viet Nam and extra revenue that may flow to government from an expanded economy will be absorbed by added social benefits.

Most disturbing to many is the popular belief that tax reform means tax reduction. So far most of the reform seems to consist of shifting rather than reducing taxes — shifting them mainly to the shoulders of business, where eventually they must be passed along to consumers — apparently the very people who are allegedly benefitted by tax reform. On this aspect of current discussions of tax changes, a bulletin of the Chamber of Commerce of the United States observes. ". . . *tax reform . . . can* be achieved more wisely by concentrating less on shifting the tax burden from one economic group to another and more on reducing the total tax take of government." Whatever is done in regard to taxes, the chances are good that the paradox of growing impoverishment and inexorably expanding welfarism will continue — at least until the taxpayer revolt or bankruptcy of government and taxpayer alike calls a halt to this situation At least that's the way it looks from where we stand

Blood And Birthdays

A new idea for relieving the serious blood shortages that plague many parts of the country, especially in the summer and after Christmas, is proposed in an article, "Why Is It Tough To Get Blood?," in a recent issue of the American Legion Magazine.

Tom Mahoney, author of the article, suggests that every eligible person celebrate his or her birthday by giving a pint of blood at their local blood bank or collection center

"If only one or two additional persons out of 100 would give one pint of blood a year," says Dr. Frank Coleman, president of the American Association of Blood Banks, "the shortage problem would be relieved at least for the near future."

The demand for blood has been rising steadily because of advances in surgery and therapy and has now passed 6.5 million pints a year, the article reports. Blood needs are increasing 10 per cent a year at many hospitals, and work of the blood clearing houses is rising at about 15 per cent a year. They shift blood about the country to meet shortages and enable blood given locally to be credited to distant patients.

But, our population is increasing only about one per cent a year and while nearly 105 million Americans are qualified by age and health to give blood only two to three per cent of them do so. If you are between 21 and 60, or even older if your doctor approves, you can help by donating at your local blood bank or collection center.

You don't need to wait for your birthday.

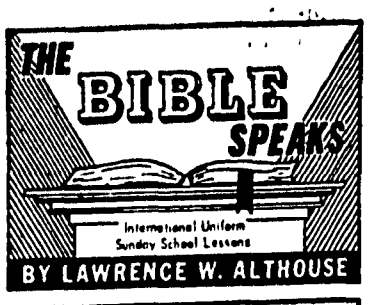
Local Weather Forecast

(From the U. S. Weather Bureau at the Harrisburg State Airport)

The five day forecast for the period Saturday through next Wednesday calls for temperatures to average below normal with daytime highs in the mid 60's and overnight lows in the low 50's. Cool throughout the period with little day to day change.

Rain may total one-half inch or more with chance of showers at the beginning and again at the end of the period.



GOLDEN DAYS?

Lesson for September 28, 1969

Background Scripture: 1 Kings 4 20, 21, 29 34, 5 13-18, 9 1 9 10 11.
Devotional Reading Psalms 53.

Rev. Althouse

Hitler's pre-war Germany was a shiny, glittering thing. New super-highways, the autobahns, traversed Germany like shining concrete ribbons. Everywhere there were bright colors, pageantry, massed choruses and bands, gigantic mass meetings, beautiful new stadiums and public buildings. To many, Nazi Germany was the Fatherland's "Golden Age."

Imperial Russia also dazzled the eye. The Imperial family lived like ancient oriental kings. The Kremlin, Moscow's strange religious, cultural, and political citadel, contained some of the most priceless art treasures and jewels ever seen by man. The nobility and upper classes lived in brilliant luxury and culture.

Gold-plated!

Pre-Civil War United States also sparkled, although more like a "diamond-in-the-rough" than a finely-cut and polished gem. The country was vigorous and brawling with agressive industriousness. In the North were the impressive factories, canals, railroads, and large urban centers. In the South were beautiful and stately plantations which breathed a heavy fragrance of the genteel way of life.

In each of these, however, the "Golden Age" proved, in reality, to be gold-plate. Beneath the dazzling color was fraud, poverty, and misery, proving once more that "all that glitters is not gold." The Germans had to pay a terribly high price for the gold-plating of their nation. In Imperial Russia, while some lived in unimaginable luxury, the great masses of people had barely enough upon which to live day to day. In pre-Civil War U.S.A., the industries thrived on a vicious business ethic. The southern plantations were built upon the terrible institution of human slavery.

The old story

In the midst of prosperity, each of these nations was sowing the seeds of its own self-destruction. The cost each had to pay is staggering. The division between East and West Germany today is one of Nazism's more lasting results. The collapse of the Russian monarchy and the advent of Communism is the price that was paid for the Czar's follies. In the United States the Reconstruction Era after the War set a pattern of internal division and strife that still affects us today.

It is an old story. The same thing happened during the "Golden Age" of King Solomon. What began as a noble venture under David, ended as a dismal failure under Solomon. Yet, we had been led to believe that Solomon would be an even better king than his father. Was not this the young monarch who listened carefully to the wise counsel of his dying father? Was not this the humble Solomon who prayed that he might continue to be God's servant, as had been his father? Was this not the young son of David who inherited a firmly-established kingdom of power and stability? And was this not Solomon the builder who rededicated himself and his people so elequently at the construction of the temple?

The answer to all of these is Yes . . . and No. Yes, it was King Solomon, but No it was a different king Solomon who had been ruined by his own successes.

"Not wholly true"

Solomon, despite his legendary wisdom, used slave labor to build his impressive buildings. Selfishly, his own desires came before the welfare of his people and he oppressed anyone who got in his way. He was self-indulgent (anyone with all those wives would have to be!). But worst of all, what really killed the "Golden Age" of Solomon was this: "His heart was not wholly true to the Lord his God, as was the heart of David his father" (1 Kings 11:4).

Is yours?

Attend The Church Of Your Choice Sunday

NOW IS THE TIME . . .

By Max Smith
Lancaster County Agent

To Segregate Livestock

It is very important that newly purchased livestock of any kind be kept separate from the rest of the herd for a two to four-week period This is for the protection of the herd to be sure that new infections will not be introduced This time of the year many feeder cattle are bought; the danger of shipping fever is one of the major problems The new cattle should not come in contact with acclimated cattle for at least two weeks and preferable longer. They should not eat or drink from the same equipment. Special care at this period of the operation will save severe losses

To Control Rodents

We receive reports that mice and rats are present both around buildings and out in the open spaces in larger numbers this fall. This means that every farmer and property owner should give some attention to preventing them from making dens near the buildings when colder weather arrives. Good sanitation is the starting place and then remove all of their possible nesting places. Poison bait stations go along with these other practices

To Be Careful With Nitrogen

Winter grain seeding season is at hand and most producers will apply some fertilizer to both barley and wheat. In many cases if any nitrogen is applied, it will result in more rank growth and additional lodging of the grain next summer. The use of only a phosphorous-potash fertilizer is recommended in oredr to develop a good root system and to strengthen the straw. Nitrogen may have a place in soil of low fertility but in many cases is not needed for small grains.

● Many

(Continued from Page 1)

with a total of 60 head of Guernseys. For his project program, the young man has 10 head of Guernsey cows, five acres of corn, and 17 head of swine He has now shown in four state shows. He is president of the Warwick FFA Chapter and hopes to go into partnership with his father.

In the Holstein Show Earl C Stauffer, son of Mr and Mrs Clarence Stauffer, of Ephrata R1, won reserve grand champion and reserve senior champion awards with his animal, "Sunny Craft Fae Ivanhoe" He also won master fitter and master showman awards The Stauffer farm consists of 70 acres supporting 60 head of Holstein cattle. Earl has had four years of experience in the FFA program and has as his farming program seven head of Holstein cattle He is president of Cloister FFA chapter, and 1969-70 State FFA treasurer He is a Star County Farmer and will go into partnership with his father

Thomas W Aaron, son of Mr and Mrs William Aaron of Quarryville R1, won the reserve junior champion award in the FFA Jersey Show with his animal, "Lynmooies Fashion Gail" Thomas also won master fitter and master showman awards He has a farming program consisting of 12 dairy animals 12 head of swine, 11 acres of corn and five acres of alfalfa He is vice president of the Solanco FFA chapter and plans to farm with his father

tors were asked to identify the farm.

Out of all the many correct entries, R Edwin Harnish, Christiana R1, was the lucky winner. When Mrs. Harnish was notified by telephone this week of their winning $25 00, she said, "You must be kidding, I don't believe it I never won anything in my life"

Mr. & Mrs. Harnish live on a 100 acre farm and have one son. As a youth Mr Harnish was in both 4-H and FFA

Vorlex®

...THE COMPLETE SOIL FUMIGANT

It takes a complete soil fumigant to protect your tobacco crop from soil pests to insure a healthy start for *every* plant. Don't fool around with "part-job" fumigants . . . insist on Vorlex — the *complete,* whole-job soil fumigant — you'll get more pounds of tobacco per acre — more profits too!

APPLY VORLEX IN EITHER OF TWO EASY WAYS!

Row Fumigate— *All* types of nematodes, soil disease, and weeds, can be controlled by Vorlex when it's applied as a row fumigant . . . and at a cost starting as low as $20.00 per acre!

Or Broadcast (overall) Fumigate —Vorlex can also be used as a broadcast fumigant to control nematodes and soil disease.

Either method of Vorlex application can provide a healthy stand with even growth; plus uniform maturing and a bigger yield.

Each year Vorlex fumigate your entire tobacco acreage . . . get more tobacco per acre — more profits for you.

VORLEX is great for vegetables too! TRY IT!

Swine Show Champion Is Shown By Glenn Livengood

For the second consecutive year Glenn Livengood, 15 year old son of Mr & Mrs Ira Livengood, 1906 Pioneer Road, Lancaster, took the championship honors at the Lampeter Fair Swine Show with a Yorkshire barrow.

The new champion weighed 205 pounds and was first in the single market hog division.

Paul Eckman, Strasburg R1, had the champion pen of two with his first place lightweight hogs, and Robert Weaver had the champion pen of four with his mediumweight hogs

W F Ruoss and Frank Ruoss, Ephrata, dominated the breeding swine division Individual placings of market hogs are as follows 1, Glenn Livengood, 2, Bob Weaver; 3, Clair Witwer, lightweight pen of two, 1, Paul Eckman, 2, Earl Livengood, 3, Glenn Livengood; mediumweight, 1, Clair Witwer; 2, Paul Eckman; 3, Earl Livengood.

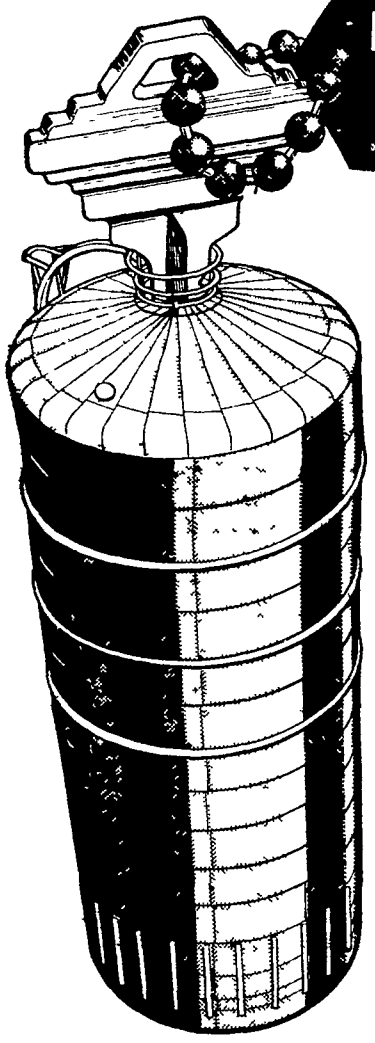
Heavyweight, 1, Paul Eckman; 2, Bob Weaver; pen of four, lightweight, 1, Glenn Livengood; medium weight, 1, Bob Weaver; 2, Earl Livengood, 3, Glenn Livengood; heavyweight, 1, Bob Weaver.

Breeding Young Boar (Duroc) 1, Frank Ruoss, 2, W. F. Ruoss; Jr spring gilts, 1, Dwight Houser (Yorkshires), 1, Frank Ruoss (Duroc); Sr spring gilt (Duroc), 1, Frank Ruoss, 2, W. F Ruoss; 3, Ed Donough, Sr gilts (Yorkshire), 1, Randy Walker; 2, Ken Findley, sow and litter Duroc, 1, W. F Ruoss, 2 Frank Ruoss.

The fellow who has an answer to everything very often doesn't understand the question

CHAMPION at the Lampeter Fair Swine Show Wednesday afternoon is shown by Glenn Livengood, 1906 Pioneer Road, Lancaster. The Yorkshire barrow weighed 205 pounds. L. F. Photo

HIGH MOISTURE CORN ENERGY



lock it in...or lose it!

Harvest high moisture corn and save three ways.
When you harvest corn early, at high moisture, you harvest it at **maximum nutrient content.** The earlier harvesting also **reduces field losses** due to lodging and dropped ears. And **costly drying is eliminated.**
HARVESTORE "locks in" more valuable TDN. The HARVESTORE system of storing and processing saves more of the valuable energy in high moisture grain. This saved TDN can add up to more profitable gains or milk production. It's like adding **extra acres** to your crop land.
Many farmers also process cornlage (low-moisture silage) through their HARVESTORE. This gives them the feed value of the entire plant. The lower moisture level also eliminates hauling and storing unneeded water.
Add the labor-saving advantages of HARVESTORE bottom unloading and automated feeding Small wonder so many owners consider **HARVESTORE the key to increased production and profit.**
For details, see or call us today. We'll show you how your neighbors are locking in extra profit with HARVESTORE.

HARVESTORE multiplies manpower and landpower

$1,090 Average Made On Pa. Holstein Sale

County consignors and buyers at the Pennsylvania State Holstein Sale held Monday in conjunction with the sixth All-American Dairy Show helped the sale to achieve a $1,090 per animal average on 37 head sold. For example, Jo-La Jess Lady, consigned by John Lapp, Gordonville, was sold to Norman Kolb, Lancaster, for $1625 The Very Good, 88 point, Marquis daughter was due to freshen to Pawnee Farm Arlinda Chief (EX 91).

Clarence Stauffer and Son, Ephrata, sold the show winning home bred Dean Captain daughter for $1650 to Howard Smith II, Mayport The three year old Sunny Craft Sue Captain, was first in class at the County Black and White Show and was classified Very Good 86. Her heifer calf brought an additional $450 from Larry McEwen of Banger, RD #2, to bring the consignment total to $2100.

J. Robert Hess, Strasburg R1, bought a Very Good Ideograph Fobes Kennedy daughter for $1275 She has 17,788 pounds of milk and 635 pounds of butterfat as a 3 year old and a promising 4 year old record in progress.

Marvin Eshleman Lancaster, bought Melvin Peifer's springing Marquis daughter for $1150 The heifer's Good Plus dam has 21,874 pounds of milk and 800 pounds of butterfat at 6 years

Other county consignors included H. Landis Weaver, Quarryville, selling a Marquis daughter and her calf for a total of $850, and Richard Rutt, Quarryville, selling a young cow for $525

Other county buyers were John H Hershey, Lititz R2, an Irvington Pride Admiral daughter for $725 and the Black and White Holstein Farm buying a Very Good Marquis for $700

Buyers from New York and Michigan paid the highest prices in the sale. Houghton College Farms, of Houghton, N Y, purchased a four-year-old cow consigned by Glenn E. Bowen, of Wellsboro, for $2,500, top individual price paid at the sale

The animal, Wildmoor Reflect Posch Pauline, was Excellent and sired by Kierland Reflector Duke out of Posch Wayne Abbekerk Doris

Second high selling animal was purchased by Carlos and Douglas Long, of Milford, Mich, and consigned by Bare Bros, Valley Pond Farms, of Lebanon, Pa

It was also a four-year-old cow, Sharon Wyndell Apollo, and sold for $2,000. She was sired by Hilltop Apollo Ivanhoe out of Swamp Hollow Sovereign Shirly The average selling price was slightly less than last year's all-time record but well ahead of the 1967 sale average Total receipts were $40,350

● Local Youths

(Continued from Page 1)

the show M M Smith, County Agent, said it was the first time a local entry had won at the show

The State 4-H Judging Team of Marvin Nissley, Mt Joy R1; Barry Longenecker, Lititz R1, Donna Hess, Strasburg R1 and Karen High, Leola, placed second They were high team in sheep and second high in Beef and Hogs Nissley was the second top individual in the contest

The State FFA judging team made up of all Lancaster County Boys was third in their contest Charles Smith, New Providence, from Solanco High School was first in swine judging and third high individual. Dale Martin, Lititz, from Warwick High School was second high individual in beef judging

The third member of the team was John Martin, Pequea R1, from Penn Manor High School He was the fifth high individual in the FFA Contest.

Giving personal attention to little details pays off big in any farming activity.

Whether it's raising a prize-winning animal . . . or harvesting a record crop . . . it's not a matter of chance. It's concentration on the little details that provides results. Farm Credit concentrates on one field of interest. Farm financing Farm Credit is your only source of *financing that serves farmers exclusively. That's why* you'll feel at home with Farm Credit.

GROW BIG

HEIFERS FAST at low cost with... NEW PURINA HEIFER CHOW

More and more local dairymen are proving that a small extra investment in heifer feeding can pay off when heifers freshen and begin contributing to the milk check.

And research has proved that heifers which produce well in the first lactation continue to be high producers over a longer milking life than average cows.

NEW Purina* Heifer Chow* has been developed to help you grow big heifers fast, conveniently and at low cost. New Heifer Chow is a palatable, coarse 14 per cent protein ration, fortified with vitamins and minerals to stimulate fast, solid heifer growth.

To build low-cost growth, you need feed only 3 pounds of New Heifer Chow per heifer per day if your legume forages are of good quality. For best results, start your heifers on the Purina heifer growing program at six months of age until 90 days before freshening when they'll be fed on the basis of their condition and on the quality of your forage.

Drop in soon and pick up a copy of our New Purina Heifer Growing Program folder. It explains the program to follow for fast-growing, early-freshening heifers at low cost.

Poultry Federation Committee Met

The Executive Committee of the Pennsylvania Poultry Federation met recently Ken Longacre, Chairman of the Legislative Committee discussed the Pennsylvania House Bill 1564 and Senate Bill 847 These Bills would "Modernize" the 1929 Act giving the Pennsylvania Department of Agriculture jurisdiction to inspect food products even though they are in consumer packages packed in other states Longacres recommended that the Executive Committee go on record favoring the passage of these bills

Henk Wentink reported that he, as chairman of the Farm Show Banquet, was successful in securing Dr Kenneth McFarland as the Farm Show Banquet Speaker The Banquet will be held during Farm Show Week on Wednesday, January 14, at the Penn Harris Hotel

The Board of Directors accepted the resignation of H W Campbell Campbell has been transferred to the St Louis office of Ralston Purina.

The Executive Committee will request that additional funds be made available for erection of a Random Sample Pullet Growing facility to be located near the Random Sample Laying House near University Park.

Dr Goodwin, head of the Poultry Science Department at Penn-State announced that there will be an open house in the Animal Industries Building, Saturday, September 27, 9:30 a m. to 11.30 a m This new building houses the Animal Science Department and the Poultry Science Department.

October 28 has been set for the Fall meeting of the Board of Directors of the Pennsylvania Poultry Federation

Landrum Hits Sausage Rule From USDA

Rep Phil M Landrum (D-Ga) last week charged that the poultry industry and the consuming public have suffered a grave injustice as a result of the chicken in sausage regulation proposed by the U S Department of Agriculture.

The Georgia congressman's statement, made to the House of Representatives, took USDA to task for limiting to 15 percent the amount of poultry to be used in hot dogs without discriminatory labeling

He said the action was doubly outrageous since the Agriculture Department " is proposing to allow the red meat industry to stuff hot dogs with up to 33 percent fat

"As we all know, poultry meat is very low in fat content It would therefore seem much more nutritious to offer the public hot dogs and other sausages with high percentages of good protein than an almost flammable product "

Rep Landrum went on to point out that there "is not even a taste difference for the discrimination against poultry meat in hot dogs "

The congressman placed in the record the National Broiler Council statement on the regulation NBC's statement noted that the regulation had some positive points, but also created certain apprehensions within the poultry industry The most serious of these are the apparent competitive advantages given the red meat industry

It was pointed out by NBC that USDA regulations require beef hot dogs to be made of beef, pork hot dogs from pork, but authorize up to 85 pc of other meats in chicken hot dogs These 85 pc may include less desirable red meat components

Quite the opposite situation prevails when chicken is used in the "all meat" hot dog, the statement explained By official definition the checken meat used must be lean muscle meat — a product with less than 10 pc fat.

USDA employs a far more lenient "meat" definition for red meats and, therefore, it becomes possible, to blend the lean, low fat chicken product with certain low priced red meat items having as much as 70 pc. fat, it was noted

USDA Lowers UpperAge Limits Of Calves Vaccinated Against Brucellosis

The upper age limits for calves vaccinated for brucellosis have been reduced under amendments effective on publication in the **Federal Register** scheduled for September 20, the U S Department of Agricultural says

The amendments were approved by USDA's Agricultural Research Service Dairy heifers may now be vaccinated at 3 to 8 months (90 to 239 days) of age and beef heifers at 3 to 10 months (90 to 299 days) of age

Formerly, the age limits for dairy heifers had been 3 through 8 months and beef heifers 3 through 11 months of age Reducing the upper age limit at which calves may be vaccinated for brucellosis decreases the number of animals that may retain vaccinal titers and react when tested for brucellosis

The amendments bring the Code of Federal Regulations into conformity with the Uniform Methods and Rules for brucellosis eradication The change was recommended by the United States Animal Health Association and approved by ARS' Animal Health Division

FLAT DECK CAGES

Poultry men around the world are fast equipping their poultry houses with the "high profit return" automated, Big Dutchman Flat Deck Cage Systems and Equipment as shown above. Contact your Big Dutchman Branch or Representative today . . . about yours.

Facts Dairymen Should Know

By Victor Plastow
Associate Agricultural Agent

Molds Can Be Deadly For Young Calves

Only two parts per million of mold-produced Aflatoxin can kill young calves and only 0 4 parts per million can seriously stunt their growth. In hot summer weather when the humidity is higher when grain becomes dampened for any reason, a very real danger of sudden death in young calves from mold poisoning exists Grain to be fed young calves should be kept in a dry place No more molasses should be added to calf feed than enough to control dust The worst management practice which contributes a mold poisoning is the practice of keeping the grain box filled with grain constantly. Calves should be fed what they will clean up in a day Grain boxes for baby calves should have metal pans or liners which can be regularly cleaned. When the drinking water source is close to the grain box, calves often get the grain very wet; and, in warm weather molds grow extremely rapidly in the damp feed. One calf or a penful may be found dead without showing symptoms as a result.

Labor Saving With A Pipeline Milker?

There are considerable savings in milking labor when herds are milked by pipeline milkers. Milking labor amounted to 51.1 hours per cow per year with bucket milked herds while pipeline milked herds required 32.4 hours per cow per year. Thus a saving of 18 7 hours per cow annually was realized In addition, 7 hours per cow were saved in cleaning and care of equipment. That's partly because pipelines can be automatically cleaned in place When it came to milk produced per man hours, the around the barn pipeline led the bucket milked herds 395 lbs per hour to 257 lbs per hour Milking parlors and milking barns fell in between with 332 lbs of milk milked per hour per man All types of systems showed wide variations in their performance. There is room for improvement in milking labor on many dairy farms.

A Calf A Year

Achieving a twelve-month average calving interval is one of the most important goals for a dairy herdsman in terms of net income. It is also one of the most difficult. For each day of delay beyond 12 month reduces a cow net return by 70 cents to one dollar. In order to calve within 365 days, a cow must conceive within about 85 days after freshening This can be achieved by allowing 60 days sexual rest before breeding and one repeat service, if necessary Cows that have difficulty at time of calving or fail to clean properly usually require 20 to 30 days additional rest Trying to shorten the calving interval by breeding back too soon after calving often delays the next calving because of early embryonic death or abortion.

Liquid Manure

Dairymen who plan to enlarge their herd and are thinking about a liquid manure system should make a careful comparison of the alternatives. Often times

FOR THE
FARM WIFE AND FAMILY

BREAKFAST DELIGHTS

By Mrs. Richard C. Spence

Breakfast can be groovy: you don't have to stick to traditional breakfast foods But nutrition is the key to breakfast planning The morning meal should provide ¼ to ⅓ of the day's nutrients. balanced between the Four Food Groups Foods from the fruit and vegetable group bread and cereal group, and milk and milk products group should be included each morning For variety add meat or an egg to the basic menu

Now that school has started it is especially necessary to serve a nutritious and envigorating breakfast Here is a quick and easy way with oatmeal

HAPPY OATMEAL

- 6 packets (1 ounce each) instant oatmeal
- 4½ cups boiling water
- 6 tablespoons sugar
- 1 can (11 ounces) mandarin orange segments, drained
- 1 can (8½ ounces) crushed pineapple, drained
- Raisins
- Maraschino cherries

For each serving of oatmeal, empty 1 packet into a serving bowl. Pour ¾ cup boiling water over each bowl of oatmeal Stir until well blended (For thinner oatmeal, add a little more boiling water For thicker oatmeal, a little less)

Stir in 1 tablespoon sugar, 1 heaping tablespoonful of mandarin orange segments and 1 heaping tablespoonful of crushed pineapple. Garnish with raisins and maraschino cherries Serve with milk Makes 6 servings

INDIAN SUMMER FRIED MUSH

- 3 cups water
- 1 cup enriched corn meal
- 1 teaspoon salt
- 1 cup cold water
- ¼ cup bacon flavored bits

Heat water to boiling in large saucepan Mix cornmeal and salt with cold water Pour into the boiling water, stirring constantly Bring to boil, cook until thickened, stirring frequently Cover, continue cooking over low heat 5 minutes or longer Add bacon bits Stir until thoroughly combined

Pour cooked mush into 8½x4½x2½ inch loaf pan which has been rinsed with cold water. Refrigerate several hours or overnight. Cut chilled mush into ½-inch slices. Fry on lightly buttered griddle or in fry pan until golden brown, about 10 minutes per side. Serve hot with maple syrup. Makes about 8 servings

COUNTRY BREAKFAST WAFFLES

- 1 9-ounce package frozen waffles
- 1 can (10½ ounces) condensed cream of mushroom soup
- ¾ cup milk
- 6 hard-cooked eggs, cut into pieces
- 1 3-ounce package thin sliced smoked beef, cut into pieces

Prepare frozen waffles in toaster or oven according to package directions. Combine soup and milk, heat thoroughly. Add eggs and beef. Cook for 5 minutes, stirring constantly. Spoon mixture over waffles Garnish with chopped parsley. Makes 6 servings.

SAVORY SAUSAGE RING

Sausage Ring:

- 1½ pounds pork sausage meat
- ¾ cup rolled oats (quick or old fashioned, uncooked)
- ⅔ cup chopped peeled apple
- ¾ teaspoon salt
- ¾ teaspoon basil, crushed
- ½ teaspoon sage
- 1 egg
- ⅔ cup milk
- 6 canned peach halves, drained

Scrambled Eggs:

- 3 tablespoons butter or margarine
- 12 eggs
- 1½ teaspoons salt
- ⅛ teaspoon pepper
- ½ cup milk

For sausage ring, combine

(Continued on Page 21)

DO YOUR GYPSY THING in a swirling shawl with lots of fringe. Toss it over your shoulder with gay abandon; it's the carefree summer cover. This triangular shawl is very easy to knit in a blackberry stitch. With large needles and worsted yarn, this stitch is quick and fun to do. Free instructions are available by sending a self-addressed. stamped envelope to the Needlework Editor of this newspaper along with your request for Leaflet PK 1721

sausage, oats, chopped apple, salt, basil, sage, egg and milk thoroughly. Place peach halves in bottom of ungreased 6-cup ring mold. Spoon sausage mixture over peaches and pack firmly into mold. Bake in preheated moderate oven (350 degrees) 45 to 50 minutes. Invert mold on shallow pan lined with absorbent paper, do not remove mold. Drain.

For eggs, melt butter in large skillet over low heat Beat together eggs, salt, pepper and milk until fluffy Pour into skillet. Cook over low heat, stirring lightly until eggs are just barely set.

Turn drained sausage ring (still in mold) right side up, then unmold onto serving plate Spoon scrambled eggs into center of ring Garnish with parsley and crabapples. Makes 6 servings

NOTE. Poppy Seed Corn Bread is an excellent accompaniment to this sausage ring. Recipe follows:

POPPY SEED CORN BREAD

- **1 10-ounce package corn bread easy mix**
- **2 teaspoons instant minced onion**
- **1 egg**
- **½ cup milk**
- **1½ teaspoons poppy seed**

Put onion, egg and milk into bag of mix. Squeeze upper part of bag to force air out Close top of bag by holding tightly between thumb and index finger With bag resting on table, mix by working vigorously with fingers Mix about 40 seconds or until egg is completely blended.

Squeeze bag to empty batter into [illegible] aluminum foil pan contained in package. Do not grease pan. Sprinkle poppy seed evenly over top of batter. Bake in preheated hot oven (425 degrees) about 20 minutes. Open folds of pan for easy cutting and serving. Serve warm. Makes 6 servings.

" " " "

PANCAKES 'N BANANAS

Maple Baked Bananas:

- **4 bananas**
- **⅔ cup maple syrup**
- **¼ cup butter or margarine, melted**
- **¼ teaspoon cinnamon**

Pancakes:

- **1 cup pancake mix**
- **1 cup milk**
- **1 egg**
- **1 tablespoon melted or liquid shortening**
- **¼ cup chopped pecans**

For maple baked bananas, peel bananas and cut in half crosswise, then cut each half in half lengthwise. Arrange in 13 x 9-inch baking pan. Combine syrup, butter and cinnamon. Pour over bananas. Bake in preheated slow oven (300 degrees) about 15 minutes, basting occasionally.

For pancakes, place mix, milk, egg, shortening and pecans in bowl. Stir lightly until batter is fairly smooth. For each pancake, pour about ¼ cup batter onto hot, lightly greased griddle to make 8 pancakes. Turn pancakes when tops are covered with bubbles and edges look cooked Turn only once Serve with hot maple baked bananas Makes 4 servings

Serve with pineapple juice, milk or coffee

4-H Club Activities

BROKEN BIT
By Cindy Enck

The monthly meeting of the Broken Bit 4-H Club was held at the home of Mr. and Mrs. Charles Risser; Sun Valley Road, R. D. 1, Stevens, recently.

Ribbons were awarded to the winners of the gymkanna which had been in July.

The club has some exciting events scheduled for October. Among them is a roller skating party, October 15 and the 4-H National Horse Show, October 24. Also in this month's plans is a trip to The King Ranch October 28th with Broken Bit 4-Hers horses trucked to the ranch for a trail ride A Halloween party will be a part of the next meeting to be held at the home of Mr and Mrs. Robert Gregory; R. D. 1; Lititz.

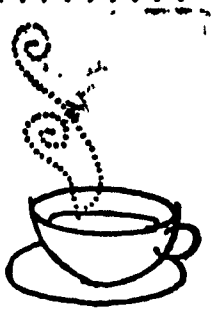
County Council

The 4-H County Council met Thursday, September 18. On October 7 is the Teen Loaders Banquet. A Barn Dance is scheduled for October 11 for County Council members and will be followed by a hay ride at 11 00 P.M On November 8 a Hogie Sale will be held All orders must be in at the Farm and Home Center by October 31.

DID YOU KNOW — Trees have two layers of bark — the inner bark which carries food made in the leaves downward to cambium and storage cells, and the outer bark or inactive cells which provide protection for the

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist



Poultry Facts

The round inspection mark on poultry is assurance of a clean, wholesome product It dosen't relate to the quality or tenderness of poultry

THOMAS

Every bird within a federally inspected plant is inspected

The shield-shaped grade mark is assurance the poultry has been officially graded for quality under USDA supervision Poultry can be graded only if it has first been federally inspected for wholesomeness

Appearance, meatiness, fat cover and freedom from defects are the major quality factors determining the grade

All grades are equally nutritious Tenderness isn't a grade factor; it is determined by the age of the bird, indicated by "class" name.

The U S.D.A. has grades for chickens, turkeys geese, ducks and guineas.

Duckling is a young duck A young chicken can be labeled as a frying chicken or a broiler Fryer-roaster is one of the classes of young turkeys—they can also be labeled as young turkey, young hen, or young tom.

Fowl is another name for stewing chicken.

● Have You Heard?

(Continued from Page 21)

The terms for different aged chickens indicate the relative tenderness of poultry and suggest appropriate cooking methods

You can cook young poultry in a variety of ways

Older poultry is best cooked with boist heat Cooked properly older chicken can be just as tender as a young chicken.

Turkey is an economical poultry choice at any time of the year and is in abundant supply the year round

Poultry is perishable Therefore, keep it in the freezer if you do not plan to cook it within 2 days

Poultry should be completely cooked at one time Never partially cook poultry one day and finish cooking it a later time This could encourage harmful bacteria growth

Tips On Making Dried Flower Arrangements

When making dried flower arrangements, keep containers natural They may be a slab of wood, a brick or an earthenware container Try to express the feeling of autumn, the casualness of a "design of nature" Or you can use fall vegetables arranged in a market basket Try for the feeling of an abundant market place

Some materials you can use for fall arrangements include

Grasses — fountain, pampas, timothy

Grains — barley, field corn, oats, rye wheat, sorghum

Berries — barberry, bayberry, black alder, bittersweet

Vegetables — artichokes red onions, hot peppers, gourds, purple cabbage

Temperatures Watch Frozen Food

Keep a watchful eye on frozen foods you have stored in a conventional refrigerator, one with freezer storage inside the refrigerator, advises Harold E Neigh, Penn State extension consumer economics specialist Just because a package of food is hard is no indication that the temperature is cold enough To keep its best quality, frozen food should be stored at zero degrees

Ground Bettles

Many home-owners continue to report an invasion of millepedes or some ground beetles in or about the home; this is often true during late Summer and Fall. Most of these insects are harmless but are a nuisance, as the weather gets colder, we may have clover mites and box elder bugs heading toward buildings Suggested control includes spraying the areas several times each week with materials such as sevin, chlordane, lindane, or diazinon, repeated sprays should give good control.

extra sow and gilt power

with FUL-O-PEP Sow Ration Cubes

FUL-O-PEP SOW RATION CUBES are a complete feed designed for the brood sow.

GUARANTEED ANALYSIS

Crude Protein, Not Less Than	15 00%
Crude Fat, Not Less Than	2 50%
Crude Fiber, Not More Than	8 00%

FEEDING DIRECTIONS

1 Feed 7 to 8 pounds of Ful-O-Pep Sow Ration Cubes per head daily during the flushing period from 10 days prior to breeding, through breeding

2. From breeding until 5 days prior to farrowing, feed each animal 5 to 7 pounds daily in drylot or 3 to 5 pounds daily on good green pasture. Regulate the amount according to condition of the animal The higher level should be used during the last month of gestation

3 For 5 days prior to farrowing, to 5 days after farrowing, feed 4 to 5 pounds daily per animal Feed 3 pounds per head the day after farrowing and increase feed at the rate of 1 pound per day until the sow is eating 10 to 12 pounds daily

4 Feed 10 to 12 pounds daily per head to sows nursing average size litters of 7 to 8 pigs Sows nursing 8 or more pigs should get 12-14 pounds or may be self fed.

LETTERS TO THE EDITOR

14th Sept , 1969

Dear Editor:

It has been some months since I last wrote and we are in the Spring season here now The winter here was unusually mild and where they irrigated they were cutting lucerne hay every month It is the exceptional season that they cut during July and August The drought is still persisting over vast areas of Queensland, but here in Toowoomba, and East toward the Coast, the rainfall has been quite good In fact, during August, Toowoomba had a record rainfall of nearly 8 inches yet 50 mi further West they haven't had 8 in. of rainfall this year Most of the grain is in head but due to lack of moisture much of it is only about 12 inches high The very best prospects for grain in Queensland, would be a 50% crop They have been shipping grain and livestock feed from southern Australia and it will undoubtedly be continued The State Government has been standing most of the freight charges as a drought relief measure There has been rather heavy marketing of cattle and sheep but the prices have held quite steady. There seems to be considerable trouble with "bloat" here, especially these last few weeks on the young clover This past week I heard of seven cattle dying of bloat They do have a spray now which is quite good if the pasture is treated just before grazing The early vegetable crops being harvested now are red beets, onions, potatoes, and peas The company I work for expects to have a larger acreage of soybeans raised this year so I will be calling on farmers to sign contracts in a few weeks The summer crops are planted mostly in November and December Because of the drought and poor prices of grain I think the land values are slipping just a bit I made an offer on a 473 acre place last week but it sold since to another buyer, to settle an estate We finally got moved into our new house a few days ago, after waiting about 60 days longer than we expected too We are extremely pleased with the fine job the builder did, even though he was very slow It was 6 mo from start to finish The black-top drive and curbings should be finished in a few days My wife's cousin from California expects to visit us in October I had a most interesting letter from Russ Seibert of Elizabethtown, Pa , who got my address from your paper He had spent 20 mo in Australia in 1943 and '44 and he told of many amusing experiences that happened to him while down here He works on a large poultry farm now and when he retires in a few years he wants to make a trip here again Next week end is the start of the annual Carnival of Flowers here in Toowoomba They select a Queen and have a parade with many beautiful floral floats. lasting several hours They also have prizes for the best home flower gardens, in the city, and also in the county areas The Carnival attracts many visitors from far and wide, and is a photographer's dream I can only say that for a beautiful city, in a unique setting, Toowoomba would be hard to surpass

The average prices of the Stud Beef Cattle Sales held at the Royal Exhibition was down $300 00 from last year to $1450 - 00. This decline was attributed to the wide spread drought.

The first Charolais Semen from England arrived from England 4 mo. ago and the beef raisers who used it are just about counting the days until the first cross-bred calves will arrive I have seen reports that about 80,000 ampules of Charolais semen has been ordered by Australian breeders over the next few years. I personally have ordered 50 ampules which is due to arrive in Sept of 1970 Perhaps you have heard they have a new beef breed here in Australia called the Murray Gray They are supposed to have been a cross between Angus and Shorthorn, but are gray in color They are not bad cattle, but in my humble opinion they are a poor second to Charolais They did receive quite a boost recently when a Texas Breeder's Assn. ordered 1000 ampules of Murray Gray semen to be imported from Australia. Anyway it would be good to hear from anyone wanting to swap notes about farming, or things in general from the land down under.

Kindest regards,

Amos Hively

Carpetbagger

The term, carpetbagger, did not originate in the reconstruction after the Civil War but was a term of derision long before that event It was applied in the old west to denote promoters of wildcat banks whose earthly possessions were contained in their carpetbags.

Rats

Rats like to seek more comfortable homes during the early fall. Cleaning up trash piles, stone piles and junk helps in controlling them. Also ratproofing buildings help prevent rats from getting into food or feed, says Stanley G. Gesell, extension entomologist at The Pennsylvania State University. See your county extension agent for further information on rat control.

FREY FREE STALL
Lifetime Free Stall Housing

Cut bedding costs 75%, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6". Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10" concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

- 8 Models all steel welded farm and feedlot gates
- 2 Models all steel welded head catch gate

Look Out For Bloat!

A dairyman chopped a load of 5 inch high alfalfa and put it in his feed bunk to replace silage. Returning from town three hours later, he found that 19 cows were dead and several others severely bloated

Another dairyman saw a cow eat a pear from a tree The next morning she was dead. The pear had lodged in her esophagus and caused her to bloat.

University of Maryland veterinarians say that bloat can financially ruin a farmer within a few hours

What causes a cow to bloat?

Dr Robert C Hammond, Extension veterinarian, University of Maryland, says, "Anything that causes too much gas to be formed," as in the case of the chopped alfalfa, "or anything that prevents gas normally formed from escaping," as in the case of the pear.

Dr Hammond says that the first symptom of bloat is a fullness in the left flank area; the animal stops eating and shows some discomfort.

"Increased distress follows," he continues, "as evidenced by swallowing, stamping, lying down and getting up, grunting, and kicking at the stomach."

"In advanced cases," he continues, "the cow breathes shallowly and frequently through an open mouth with her tongue out Finally she will fall and, unless treated radically, die in a few minutes from suffocation"

Dr. Hammond stresses that treatment of bloat must do two things (1) It must relieve the gas already formed, and (2) it must prevent more gas from forming

"Mild cases of bloat can be treated by tying a rope in the cow's mouth to keep her swallowing and bringing up gas," he says "While more severe cases can be treated by a drench using household detergents (½ cupful in water), coal oil (4 teaspoons in a pint of milk) or turpentine (4 tablespoons in a pint of milk).

Dr. Hammond warns that severe cases may need to be treated more dramatically by relieving the gas through the rumen wall, either by puncturing with a troca and canula or by making an emergency incision with a knife. He continues saying that wounds of this type do not heal well, but in emergencies may save the life of the cow.

Dr Hammond also stresses that it is important to call your veterinarian immediately in cases of bloat "Your emergency treatment may cure her, he continues, "but if it does not, help will arrive too late"

As one farmer expresses it, Dr. Hammond said, "he would rather have his cow getting better while the veterinarian was coming, than to have her getting worse while he was being called.

The Satisfaction That Comes From Doing A Good Job Of Farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6.0 to 6.5 or higher, you can expect to harvest as much as 5 more bushels of corn per acre, with similar increases for all other forage and cash crops.

Sire Power, Inc.

The newly formed Federated Bull Stud owned and controlled by NEBA, The Maryland Artificial Breeding Cooperative, Inc, and The West Virginia Artificial Breeding Cooperative has adopted the name SIRE POWER, INC.

Directors of the new Federation held their first meeting on September 5, 1969 As one of their first items of business, they chose a name that is both appropriate and descriptive, SIRE POWER INC This organization will officially begin operation on October 1, 1969.

SIRE POWER, INC is a Federation owned and controlled by the above named Artificial Breeding Cooperatives. It will own all sires, be responsible for their selection and purchase, and for the processing and distribution of their semen In addition, SIRE POWER will handle all national advertising and promotion and be responsible for the sale of semen outside of the member co-op areas Facilities such as land and buildings that are needed by SIRE POWER will be rented from the member co-ops, each of whom will purchase semen solely from or through SIRE POWER, INC

SIRE POWER, INC will be controlled by the following Board of Directors Fred Downey, Williamsport, Maryland, President, Ira Yoder, Selinsgrove, Pa, Vice President; George Butler, Wellsboro, Pa, Treasurer; Edward Flitcraft, Woodstown, New Jersey, G C Sommer, Southside, West Virginia, Richard Remsburg, Jefferson, Maryland, and John Schwenk, Allentown, Pa W Lewis Campbell, Manager of The Maryland West Virginia Bull Stud has been appointed Secretary

F Pressly Shannon, present NEBA manager and formerly manager of The First Pennsylvania Breeding Co op of Lewisburg, Pa has been named Manager of SIRE POWER, INC. Other appointments thus far made are H F Pfaff, Assistant Treasurer, and Attorney Henry C Schragger, Legal Counsel

NEBA as a member of SIRE POWER will operate independently as a service organization It will set its own prices, hire its own employees, elect its own directors and committeemen, and be responsible for local advertising. as well as continued publication of the NEBA News.

Start raising more and better Calves

the Easy NURS-ETTE way

No more carrying pails of warm water or hand mixing milk replacer. Just fill the hopper of the NURS-ETTE with milk replacer and the NURS-ETTE will mix milk replacer and warm water and keep it warm until calf nurses the mix (approx. 14 oz.)

Then it will mix a fresh batch of water and replacer.

GRANGE NEWS

Fulton Grange #66 held their regular meeting September 22 with Clifford W Holloway Jr. Master, conducting the business session Five candidates were received into full membership by receiving Third and Fourth Degrees Also two candidates for Russelville Grange, Chester County, received the degrees.

Fulton Grange's float in the Southern Lancaster County Community Fair parade September 19 at Quarryville placed first in the Best Appearing Farm Group category. The theme was Preserve America's Future.

Lloyd and LeRoy Welk gave reports of the State Grange Youth Camp they attended August 22 24 at Camp Hamilton.

The newly elected officers will be installed at the next meeting, October 13 Booster Night will be observed October 27 beginning with a covered dish supper at 7 p m.

Lancaster County Pomona Grange will hold their fall meeting at Fulton Grange Hall Saturday, October 18, 8 p m. There will be election of officers for a two-year term and the Fifth Degree will be conferred The committee for Fifth Degree applications from Fulton Grange is Mrs Gyles Brown, Mrs Norman Wood and David Wissler.

Mr. & Mrs Clifford Holloway were named alternate delegates to the Pennsylvania State Grange convention to be held at Lewistown October 27-30 Stanley Stauffer Jr will accept applications for Sixth Degree until Oct 10.

Fulton Junior Grange will hold their regular meeting at the Grange Hall October 13 and will serve the refreshments for the Subordinate Grange Prizes will be awarded in the jewel box craft contest

AVERRIL ROYER won the grand champion Holstein showman and fitting honors at the Junior Dairy Show in Harrisburg Monday.

Frost

Cooler weather and frost means different things to different people; however, one common meaning is that Fall is just around the corner and the 1969 cropping season is rapidly coming to an end Feed producers are urged to become acquainted with the results of a killing frost on various crops; many livestock producers are faced with this problem each year When frost hits the common grasses such as bluegrass or timothy, there is little change in the plant and no danger of livestock poisoning When alfalfa or clover is frosted it does not become toxic but there is greater danger of livestock bloating from the crop if consumed when the frost is still on the plant When sudan grass or the sudan-sorghum hybrids are hit with a killing frost they may be poisonous when consumed immediately in a fresh condition, however, after several days of drying, they may be utilized

Sept. 30 Deadline For Livestock Expo Entries

United States and Canadian livestock breeders are reminded that September 30 is the last day for filing entries for the annual Pennsylvania Livestock Exposition, November 8-15, at the Farm Show Building, Harrisburg

This year's event, the thirteenth in the annual series, has a new manager He is Thomas W Kelly, a native Pennsylvanian who comes to the Exposition with a background in livestock association work The former manager Harold R McCulloch, will retire following this year's show, but is serving as co manager until that time

Last years' exposition attracted exhibitors from 24 states and Canada and included more than 3 700 entries of beef cattle, sheep swine and pleasure horses

Cattle, sheep and swine division entries vie in breeding, on-hoof and on-rail classes

Premiums offered total more than $35,000

The show again will feature the popular Appaloosa and Quarter Horse Sales, and the Suffolk Yearling Bred Ewe Sale These are in addition to the auctions of market and feeder animals, regularly scheduled Exposition activities The educational intercollegiate and junior livestock judging contests, as well as the live hog evaluation contest, are again among the week-long activities

A September 1 survey of Pennsylvania seedleaf tobacco growers indicates a crop of 38 million pounds, an increase of one percent from the previous month's estimate If the forecast is realized, the output will be one percent larger than last year's but 16 percent less than the recent five-year average production

Yield prospects have increased to 1 900 pounds per acre 100 pounds more than 1968 and about 110 above average, according to the Pennsylvania Crop Reporting Service

School Lunch Program In 24th Year

When the National School Lunch Act was established in 1946, the program became the forerunner of other child nutrition programs which the U S. Department of Agriculture administers Last year the school lunch program helped offer noon meals to about 20 million children in all parts of the country, according to a Department report Almost 3 4 billion meals were served October 12-18 will be designated as school lunch week this year.

WASHINGTON REPORT

Congressman Edwin D. Eshleman

16th District—Pennsylvania

Government business is being carried on these days in an atmosphere of rather deliberate calm. It is a refreshing change from just a few months ago when everything seemed to be embarked upon with a touch of frenzy. There is a dedication to meeting the great problems of our era, but in a fashion calculated to place expectations in line with reality.

Congress lately has been noticeably devoid of social crusades It is an absence which, in my opinion, is a welcome relief for the nation The crusades of the past several years were remarkable for what they promised, ambitious in what they set out to do, and cruel in their failure to deliver.

The legacy of the federal crusades is far more tragic than the thousands of disappointed people left with dashed hopes. The deep feeling within many Americans that borders on distrust of all authority also can be attributed to the aftermath of unfulfilled pledges. So many slogans were developed, so many commitments were established and so little was done The result so obvious today is a collapse of confidence in Government and an uneasiness about the ability of Government to deliver services or keep its promises

Restoring confidence and quieting uneasiness is mostly a matter of dealing with the dreary details that were so often overlooked in impassioned crusades Government in years past has lacked a preoccupation with performance Good intentions were substituted for actual achievement. Any problem that reared its head had to be struck down immediately or at least a commitment made The attack was usually a matter of appropriating money and expanding the bureaucracy One more program was added to an already incomprehensible jumble But nothing really happened because none of the crusaders wanted to be both ered with the bothersome details of making their ideas workable

The challenge facing us now is to make things happen Congress should recognize the need for sensible programs of a modest nature rather than more magic remedies Among the foremost considerations should be an attempt to put the Government machinery into good working order so that reasonable expectations can be met.

Maybe the present lull in crusade activity is only a temporary thing brought on because crusaders are taking some time to think up more glowing dreams. But then again, maybe we have finally reached a point when the majority of Americans and their legislators are willing to talk less and do more. If the latter is the case, it indeed is the beginning of an era of promise.

ROHRER ATTENDS DEALER MEETING

Robert K Rohrer of Quarryville, attended a two-day sales meeting sponsored by the Patz Company, a major farm material handling equipment manufacturer

Under the direction of Patz District Representative, George Heath, the schedule included a tour of facilities and an examination of the Patz experimental farms which feature aboveground controlled manure storage systems

Also on the agenda were discussions of procedures affecting Dealer sales and service and a comprehensive review of the latest engineering improvements in the Patz line of barn cleaners, silo unloaders, cattle feeders and manure stackers

The difference between a bookkeeper and a certified public accountant is several thousand dollars a year

Fall Harvest Days

Plans are underway for the Fall Harvest Days held annually at the Pennsylvania Farm Museum. Rain or shine, on October 4th and 5th, visitors to the museum will see many of the chores done traditionally on the farm at harvesting time, many of them performed by skilled workers with a farm heritage going back to the early days of this country.

The Annual Fall Harvest Days are presented by the Associates of the Pennsylvania Farm Museum and their friends. An admission fee of seventy-five cents for adults, no charge for children under twelve years of age accompanied by an adult, includes all the harvest day demonstrations, some forty in number, in addition to the [illegible] museum buildings which house one of the greatest collections of rural Americana.

One way to make a small boy behave when visiting friends: Shake well before taking.

Public Interest Decisions On Natural Resources Moving Toward Suburbia & The Cities

With the political power of America moving toward suburbia and the cities, this is where more and more of the decisions in the "public interest" are be-being made on the use of the nation's resources, Clifford G. McIntire, director, natural resources department, American Farm Bureau Federation, said this week. He addressed the 94th annual meeting of the American Forestry Association.

"Rural representation in our national and state legislatures is declining," McIntire pointed out.

"More and more the decisions that we call 'the public interest' are made by people who have little relationship to that vital sector of our national economy that assembles these raw materials into products for an expanding economy and an even higher standard of living.

"A great responsibility and opportunity rests on those who would shape public opinion in these growing centers of population that they bring into public policy development a greater understanding of the importance of land and water resources in past and future growth of our nation.

"The 'public interest' is hammered out by the legislative bodies on the solid anvil of constitutional representative government.

"The issues are placed on the forge by public communication, with the winds of the writer, the speaker, the four-color press, radio and color television, bringing them to a working heat.

"You and I as interested citizens and all those responsible for the administration of the public business are as a group the blacksmith. History is our experience, knowledge, our skill We can shape a shoe that will bring out the full strength and resource of the horse or one that will cause him to go lame before he is a mile on the road," he said.

McIntire also pointed out that in this "age of massive capability in communications, it is becoming increasingly difficult to equate the national interest to the local requirements."

As an example, he cited the current controversy over the Disney's corporation proposal for construction of a resort area at Mineral King in California.

A carefully drawn plan for multiple use of public land resources at Mineral King Valley draws nationwide opposition, he pointed out. "Money, letters and articles move into the issue from thousands who have little knowledge of the need, the care in planning and beauty reserved to be enjoyed by tens of thousands who would never have this recreational opportunity unless there is development for local needs," he said.

Tip On Suede Care

Rain won't damage suede since it's made from animal skins, says Mrs Ruth Ann Wilson, Penn State extension clothing specialist But when drying a suede garment, it's advisable to keep it away from direct heat which may stiffen the suede and produce changes in the finish.

Corn Crop

The corn crop is ripening rapidly and already we notice corn pickers starting the harvest of this big crop. Growers who do not have facilities for making high-moisture corn should be careful to give this corn some extra air or supplemental heat to remove the excess moisture as soon as possible. Corn harvested early and placed into a normal crib will not get enough air circulation to dry it sufficiently before freezing weather arrives. Also, many growers may not have enough crib space for the crop and will pile it on the barn floor or some other large area with very poor air movement. Special effort to dry the corn and keep it from molding is very much in order. New corn that is to be fed to livestock should be ground daily in order to keep it from heating and molding.

Electric Trolleys

The heyday of the electric trolley car in the United States lasted from 1902 to 1917. During that period, 80,000 street cars were in service on 45,000 miles of track, with towns as small as 5,000 in population having street car systems

LAST TWO WEEKS!

Twice as Fast Twice as easy to erect

Speedy roof rafters guarantee easy, proper placement of roof panels the first time. Rafters add great strength to the roof. Panels need only to be bolted together in three places. It's another big time-saving feature you get only in Speedy Bar-Lok corn cribs.

Stands up best—lasts longer
Wire mesh panels are 5-gauge wire—thick as a ¼" bolt! No bulge or sag. Sturdy 26-gauge galvanized roof is securely anchored to 9 steel roof rafters and side panels. Can't blow off!

Come in today and see the Speedy Bar-Lok corn crib. Let us prove to you that Speedy is twice as fast—twice as easy to erect. Let us show you all the other features that make Speedy Bar-Lok your best corn crib buy.

Archery Deer Season To Open September 27

Pennsylvania's 1969-70 seasons for big game got underway when archers begin hunting whitetail deer one-half hour before sunrise this morning.

The Keystone State, which has had unusually large deer herds for the past several seasons, has a whitetail population this year that is estimated to be slightly smaller than that of 1968.

There will be 30 hunting days during the regular statewide archery deer season. The regular archery season closes on Friday, October 31, one day before the opening of the general small game season. Sunday hunting is prohibited.

An extended 14 day archery deer season is scheduled to begin December 26 Use of bow and arrow is also permitted during the regular antlered and antlerless seasons in December

Hunting hours for bowman are from one-half hour before sunrise until sunset

Archers are permitted to take one deer of either sex, regardless of size If a hunter bags a deer during the archery season, he is not permitted to take another whitetail during the regular gunning season.

Last year, some 130,000 archers reported taking 2,747 whitetails There are more bowmen in Pennsylvania than in any other state.

Game Commission field reports indicate that deer are plentiful throughout the state, but that it would be desirable for hunters to concentrate on areas where farmers seek relief from crop damage. Not only would sportsmen be doing the farmers a favor, but they would also be more likely to encounter heavier whitetails sporting larger antlers

In addition to a regular resident or non-resident hunting license, an archery license is required to hunt deer with bow and arrow Archery licenses are available from county treasurers, designated archery license issuing agents or from the Department of Revenue, Miscellaneous License Division, Harrisburg An archery license costs $2 20

Rainfall and ideal growing conditions have produced rather lush vegetation this year, and sportsmen are cautioned that visibility will be greatly reduced during the early part of the season Both whitetails and other hunters will be difficult to spot and bowmen should be extremely cautious and extra sure of their targets.

Successful archers are reminded to tag their deer immediately, and to return their big game report card to the Game Commission within five days of the close of the archery season.

● Facts

(Continued from Page 19)

when the labor is reduced to a daily basis, and the cost is reduced to a per cow basis, and the convenience factor is compared to other systems of handling manure; the only feature favoring a liquid system is one of convenience It may be an expensive, time consuming convenience Compare before investing

Pennsylvania's potato yield per acre this year is expected to average 230 hundredweight, second only to the 1967 yield of 240 cwt A September 1 survey by the State Crop Reporting Service forecasted production from 35,500 acres at 8,165,000 cwt, 8 percent more than a year ago and about 10 percent greater than the recent 5-year average.

The PCRS, in reporting the utilization of the 1968 Pennsylvania potato crop, said that 6,815,000 cwt, or 89 8 percent of total production for the year, were sold for fresh market, processing, seed, and livestock feed. Processors purchase the largest amount and accounted for 61 percent of total sales.

PUBLIC SALE

of a DAIRY, STEER and TOBACCO FARM

to be held

SATURDAY, OCTOBER 4, 1969

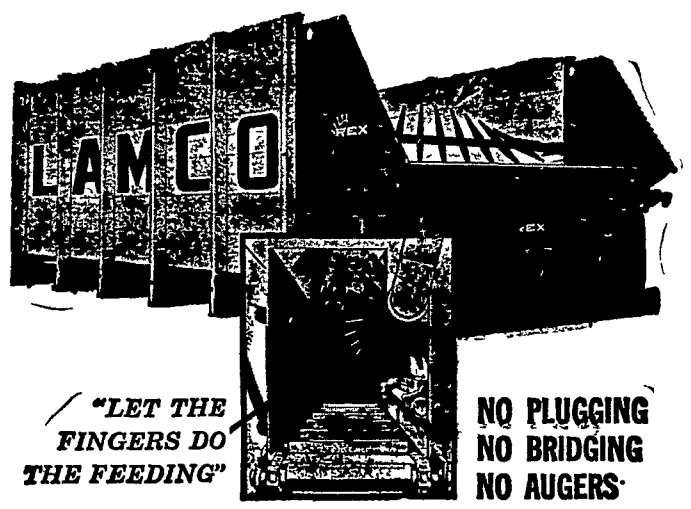
HERE ARE 6 WAYS WE COULD SKIMP ON THE FAMOUS LAMCO FORAGE BOX

1 Use a Jerky Ratchet instead of SMOOTH WORM DRIVE

2 Replace our Safe Heavy Duty Outfeed Apron with a dangerous auger.

3 Use common beater in place of our Spiral beater which peels off the material. No Bunching — No Plugging



"LET THE FINGERS DO THE FEEDING"

NO PLUGGING
NO BRIDGING
NO AUGERS

4 - Skimp on a Plain open Jaw transmission in place of our **Protectively enclosed unit.**

5 - Replace our **Positive expensive worm drive with** open gears on our Lower Beater Drive

6 - Use ordinary soft wood for our main Stringer and Cross pieces instead of **Strong Oak.**

BUT . . .

We won't skimp — We know how valuable Farmers' time is in the Harvest.

Lamco is Safe — Smooth and Trouble free

Buried City

The city of Pompeii, Italy, and its inhabitants were completely buried in a mountain of volcanic ashes from A D 79, when the eruption of Mt Vesuvius occurred, until the late 16th century

Credit Cards Can Be Costly: Handle Them With Care

Know the number and kinds of credit you have in your wallet, advises Catherine B Love extension consumer education specialist of The Pennsylvania State University If your wallet is lost or stolen it's essential that you know what you had in it

Should your wallet be lost, notify each credit care company by wire and also in writing or someone may do a lot of shopping and traveling at your expense This is serious if you have credit cards that can be used for a variety of purposes, such as gasoline, airlines, and hotels

You are responsible for all charges until each company receives written notices of loss or theft of a credit card says Miss Love Your responsibility doesn't end when you no longer have the card

It's a good idea to make a list of all credit cards and addresses of companies issuing them Such a list makes notification easier and quicker

Look through your wallet and evaluate credit cards in it Are they all necessary? Perhaps you have some cards you've never used Always return a credit card to your wallet promptly after using it and see that it can't fall out

Another thing to remember about credit cards is never to leave your wallet in the glove compartment of your car Some day you may forget to lock the car. Losing credit cards can be worse than losing cash, Miss Love adds.

Cure of Trees

In spite of the frequent rains in the past months, a number of property owners seem to have some trouble with trees and shrubs planted during this season; there is a yellowing of the needles on evergreens and dead leaf tissue on other shrubs and trees I'd like to emphasize the importance of keeping the soil damp in the root one of these plants Many of our rains are not sufficient to soak down into the root area Therefore, it is still important to soak the soil every week to ten days until the ground freezes this Fall The average storm or rain will not supply the required amount of water If the soil is kept damp until freezing weather arrives, then the plant will be able to stand the Winter much better. Severe Winter killing may result if the plant goes into the Winter too dry.
